11. Risk Disclosure

11.1. It is your obligation to peruse, comprehend and carefully consider or seek legal advice as to the risks described below in addition to the other information stated herein before deciding to access our Website and using our Services our Product. If you access and/or use or Website, Service and Product you are accepting all the risks outlined in these Terms and other risks, not specified herein.

- **(a) Legal Risk concerning Security Regulation.** There is a risk that in some jurisdictions ATRIX token might be considered to be a security, now or in the future. ATRIX does not give warranties or guarantees that ATRIX tokens are not a security in any jurisdiction. Each ATRIX token holder shall bear its own legal or financial consequences of ATRIX tokens being considered a security in their respective jurisdiction.

The legal ability of ATRIX to provide ATRIX tokens in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree of certainty that ATRIX tokens are not legal in certain jurisdiction, ATRIX will based on its sole discretion either (a) cease operations in that jurisdiction, or (b) adjust ATRIX tokens in a way to comply with the regulation should that be possible and viable.

It is your obligation to check if acquisition and disposal of ATRIX tokens is legal in your jurisdiction, and by accepting these Terms you expressly agree and warrant that you will not use ATRIX tokens should their use not be legal in the relevant jurisdiction.

There can be no assurance that governmental authorities will not examine the operations of ATRIX and/or pursue enforcement actions against ATRIX. Such governmental activities may or may not be the result of targeting ATRIX in particular. All of this may subject ATRIX to judgments, settlements, fines or penalties, or cause ATRIX to restructure its operations and activities or to cease offering certain products or services, all of which could harm ATRIX's reputation or lead to higher operational costs, which may in turn have a material adverse effect on the ATRIX tokens and/or the development of the ATRIX Services and software.

- **(b) Risk of malfunction of blockchain.** Nobody can guarantee the Ethereum source code used by ATRIX will be flaw-free. It may contain certain flaws, errors, defects and bugs, which may disable some functionality for users, expose users' information or otherwise. Such flaw would compromise the usability and/or security of ATRIX and consequently bring adverse impact on the value of ATRIX token. Open source codes rely on transparency to promote community-sourced identification and solution of problems within the code.
- **(c) Update of the Source Code.** The Ethereum source code could be updated, amended, altered or modified from time to time by the developers and/or the community of Ethereum. Nobody is able to foresee or guarantee the precise result of such update, amendment, alteration or modification. As a result, any update, amendment, alteration or modification could lead to an unexpected or unintended outcome that adversely affects ATRIX token and/or ATRIX operation or market value.

- **(d) Internet transmission risks.** You acknowledge that there are risks associated with utilizing an Internet-based Digital Assets, Products and Website including, but not limited to, the failure of hardware, software, and Internet connections. You acknowledge that ATRIX shall not be responsible for any communication failures, disruptions, errors, distortions or delays you may experience when using our Services, Website, Product howsoever caused.
- **(e) Cryptography risks.** You acknowledge that there are risks associated with cryptography, such as code cracking or technical advances such as the development of quantum computers, could present risks to all crypto-currencies including our Product. This could result in the theft, loss, disappearance, destruction or devaluation of the Product. To a reasonable extent, ATRIX will be prepared to take proactive or remedial steps to update the protocol underlying ATRIX in response to any advances in cryptography and to incorporate additional reasonable security measures where appropriate. It is impossible to predict the future of cryptography or the future of security innovations to an extent that would permit the ATRIX accurately guide the development of ATRIX to take into account such unforeseeable changes in the domains of cryptography or security.
- **(f) Development Failure or Abortion.** ATRIX is still in the process of development rather than a finished product ready to launch. Due to the technological complexity and difficulty that may be uncertain, unforeseeable and/or insurmountable, the development of all or some Services could fail or abort at any time for any reason.
- **(g) Forking.** Ethereum is an open source project and supported by the community. The developers of ATRIX do not lead the development, marketing, operation or otherwise of Ethereum. Anybody may develop a patch or upgrade of the source code of Ethereum's source without prior authorization of anyone else. The acceptance of Ethereum patches or upgrades by a significant, but not overwhelming, percentage of the users could result in a "fork" in the blockchain of Ethereum, and consequently the operation of two separate networks and will remain separate until the forked blockchains are merged.

The temporary or permanent existence of forked blockchains could adversely impact the operation and the market value of ATRIX tokens and in the worst case scenario, could ruin the sustainability of ATRIX. While such a fork in the blockchain of Ethereum would possibly be resolved by community-led efforts to merge the forked blockchains, the success is not guaranteed and could take long period of time to achieve.

- **(h) Risk of unfavorable regulatory action in one or more jurisdictions.** Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. ATRIX tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of ATRIX tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.
- **(i) Risk of theft and hacking.** Hackers or other groups or organizations may attempt to interfere with your third-party wallet, the Website or the availability of ATRIX tokens in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks.
